FIBERTOWN is the premier provider of high availability colocation solutions for companies along the Gulf Coast. Since 1997, we’ve delivered on our 100% uptime SLA. Each of our data centers are SAS 70 Type II compliant.

Our new 50,000 sq.ft. facility in North Houston features the latest in data center design, 24x7 security, fault tolerant 2N power, redundant 2N cooling, and 30,000 sq.ft. of raised floor. Our colocation data center is strategically positioned at the interexchange of leading telecommunications carriers.

Located at 12031 North Freeway, our carrier-neutral facility features a pod design for maximum efficiency of resources. Our customers benefit from the latest technological advances in data center design.
